## Jasmine Absolute Safety Information

*Tisserand and Young indicate that there is moderate risk of skin sensitization when using Jasmine Absolute topically, and they recommend a dermal maximum of 0.7%. "Jasmine absolute appears to be a moderate-risk skin sensitizer that has caused problems in 0-1.2% of people with dermatitis when patch tested at 2 or 3%." Adulterants may potentially be the cause of some of the reported sensitization. Reading Tisserand and Young's full profile is recommended. [Robert Tisserand and Rodney Young, Essential Oil Safety (Second Edition. United Kingdom: Churchill Livingstone Elsevier, 2014), 311-313.]*

*Some may experience an allergic reaction to Jasmine Oil. [Julia Lawless, The Illustrated Encyclopedia of Essential Oils (Rockport, MA: Element Books, 1995), 155.]*
